1995 Journal of Fluids Engineering Index
Index by Subject Matter to JFE, Vol. 117
Nos. 1–4, 1995

AERO AND HYDROACOUSTICS

Relationship Between Unsteady Flow, Pressure Fluctuations, and Noise in a Centrifugal Pump—Part A: Use of PDV Data to Compute the Pressure Field, S. Chu, R. Dong, and J. Katz, March, 24–29.

Relationship Between Unsteady Flow, Pressure Fluctuations, and Noise in a Centrifugal Pump—Part B: Effects of Blade-Tongue Interactions, S. Chu, R. Dong, and J. Katz, March, 30–35.

BLUFF-BODY FLOWS

Fluid Flow Structures in Staggered Banks of Cylinders Located in a Channel, M. J. Braun, and V. V. Kudriavtsev, March, 36–44.

Experimental Study of Uniform-Shear Flow Past a Rotating Cylinder, Hyung Jin Sung, Chong Kuk Chun, and Jae Min Hyun, March, 62–67.

Finite Aspect Ratio Effects on Vortex Shedding Behind Two Cylinders at Angles of Incidence, D. M. Rooney, J. Rodichok, and K. Dolan, June, 219–226.

Testing Three-Dimensional Bluff-Body Models in a Low-Speed Two-Dimensional Adaptive Wall Test Section, D. Sumner and E. Brundrett, December, 546–551.

BOUNDARY LAYER AND SHEAR FLOWS

The Interaction of Rolling Vortices with a Turbulent Boundary Layer (Data Bank Contribution), M. J. Donnelly, O. K. Rediniotis, S. A. Ragab, and D. P. Telionis, December, 564–576.

Three-Dimensional Boundary Layers Over an Infinite Swept Bump and Free Wing, Xiaohua Wu and Kyle D. Squires, December, 605–611.

COMPUTATIONAL METHODS

Prediction of the Flow Around an Airfoil Using a Reynolds Stress Transport Model, Lars Davidson, March, 50–57.

Numerical Analysis of a Vortex Controlled Diffuser, R. E. Spall, March, 86–90.

Unsteady 2-D Compressible Flow in Unbounded Domain, Deguan Wang and E. Benjamin Wylie, March, 91–96.

Perspective: Selected Benchmarks from Commercial CFD Codes, C. J. Freitas, June, 208–218.

Calculation of Numerical Uncertainty Using Richardson Extrapolation: Application to Some Simple Turbulent Flow Calculations, Ismail Celik and Wei-Ming Zhang, September, 439–445.

Multigrid Computations of Unsteady Rotor-Stator Interaction Using the Navier-Stokes Equations, A. Arnone, R. Pacciani, and A. Sestini, December, 647–658.

Numerical Simulation of Vertical Forced Plume in a Crossflow of Stably Stratified Fluid, Robert R. Hwang and T. P. Chang, December, 696–705.

FLOW MEASUREMENTS

Reinvestigation of Hot-Wire Anemometry Applicable to Subsonic Compressible Flows Using Fluctuation Diagrams, P. C. Stainback and K. A. Nagabushana, June, 263–269.

Measuring Unsteady Velocity Profiles and Integral Parameters Using Digital Image Processing of Hydrogen Bubble Timelines, S. D. Beau and W. R. Pauley, September, 331–340.

Quantitative Visualization of a Submerged Pseudoplastic Jet Using Particle Image Velocimetry, A. Shekarriz, J. R. Phillips, and T. D. Weir, September, 369–373.

Implications of Correlated Bias Uncertainties in Single and Comparative Tests, Hugh W. Coleman, W. Glenn Steele, and Robert P. Taylor, December, 552–556.

High-Frequency Heat Flux Sensor Calibration and Modeling, D. G. Holmberg and T. E. Diller, December, 659–664.

FLOW THROUGH POROUS MEDIA

Meta-Analysis of Gas Flow Resistance Measurements Through Packed Beds, Malcolm S. Taylor and Csaba K. Zoltani, March, 176–180.

A Two-Temperature Model for Turbulent Flow and Heat Transfer in a Porous Layer, V. Travkin and I. Catton, March, 181–188.

Nonsteady Stagnation-Point Flows Over Permeable Surfaces: Explicit Solutions of the Navier-Stokes Equations, G. I. Burde, March, 189–191.

FLUID MACHINERY

The Influence of Swirl Brakes on the Rotordynamic Forces Generated by Discharge-to-Suction Leakage Flows in Centrifugal Pumps, J. M. Sivo, A. J. Acosta, C. E. Brennen, and T. K. Caughey, March, 104–108.

Measurement and Analysis of Static Pressure Field in a Torque Converter Pump, R. R. By and B. Lakshminarayana, March, 109–115.

Navier-Stokes Analysis of the Pump Flow Field of an Automotive Torque Converter, R. R. By, R. Kunz, and B. Lakshminarayana, March, 116–122.

Centrifugal Pump Performance During Transient Operation, P. J. Lefebvre and W. P. Barker, March, 123–128.

Investigation of Centrifugal Pump Performance Under Two-Phase Flow Conditions, G. R. Noghrehkar, M. Kawaji, A. M. C. Chan, N. Nakamura, and Y. Kukita, March, 129–137.

Multidimensional In-Cylinder Flow Calculations and Flow Visualization in a Motored Engine, Bahram Khalighi, June, 282–288.

Sizing of an Aircraft Fuel Pump, U. S. Rohatgi, June, 298–302.

Experimental Investigation of the Flow Inside a Water Model of a Gas Turbine Combustor: Part 1—Mean and Turbulent Flowfield, J. J. McGuirk and J. M. L. M. Palma, September, 450–458.

Experimental Investigation of the Flow Inside a Water Model of a Gas Turbine Combustor: Part 2—Higher Order Moments and Flow Visualization, J. J. McGuirk and J. M. L. M. Palma, September, 459–467.

Unsteady Flowfield and Torque Predictions During the Rotation of the Guidevanes of Hydraulic Turbine, D. E. Papantonis and K. P. Pothou, September, 468–472.

Measurement and Analysis of Static Pressure Field in a Torque Converter Turbine, R. R. By and B. Lakshminarayana, September, 473–478.

The Response of a Centrifugal Pump to Fluctuating Rotational Speed, H. Tsukamoto, H. Yoneda, and K. Sagara, September, 479–484.

An Experimental Investigation of the Flow Through an Axial-Flow Pump (Data Bank Contribution), W. C. Zierke, W. A. Straka, and P. D. Taylor, September, 485–490.

Surface Roughness Effects on Induced Flow and Frictional Resistance of Enclosed Rotating Disks, Andreas Poullikkas, September, 526–528.

Tumbling Flow in Loop-Scavenged Two-Stoke Engines, Yeng-Yung Tsui and Hong-Ping Cheng, December, 628–632.

Velocity and Turbulence Characteristics of Isothermal Lobed Mixer Flows, P. Koutmos and J. J. McGuirk, December, 633–638.

Numerical Simulation of the Effects of Rotor-Stator Spacing and Wake/Blade Count Ratio on Turbomachinery Unsteady Flows, W.-S. Yu and B. Lakshminarayana, December, 639–646.

Phase-Resolved Surface Pressure and Heat-Transfer Measurements on the Blade of a Two-Stage Turbine, M. G. Dunn and C. W. Haldeman, Jr., December, 653–658.

FLUID-STRUCTURE INTERACTIONS

Computation of Vortex Lock-In in the Laminar Wake of a Circular Cylinder Using Unsteady Monopole Sources, Dartzi Pan, Yu-Chi Chin, and Chih-Hao Chang, June, 227–233.

On the Mechanism of Fluidelastic Instability of a Tube Placed in an Array Subjected to Two-Phase Crossflow, Y. Joo and V. K. Dhir, December, 706–712.

FREE SURFACE FLOWS

The Axisymmetric Motion of a Liquid Film on an Unsteady Stretching Surface, R. Usha and Rukmani Sridharan, March, 81–85.

Macroscopic Wetting Behavior of a Two-Dimensional Meniscus Under a Horizontal Plate, Kenji Katoh, Hideomi Fujita, and Hideharu Sasaki, June, 303–308.

The Vortical Structure of Parasitic Capillary Waves (Data Bank Contribution), R. C. Y. Mui and D. G. Dommermuth, September, 355–361.

Turbulent Vortex Ring/Free Surface Interaction, A. Weigand and M. Gharib, September, 374–381.

Interaction of Transient Waves With a Circular Surface-Piercing Body, Xing Yu and Ronald W. Yeung, September, 382–388.

The Effect of Surfactants on the Wave Growth and Transition to Slug Flow, Eugene Kordyban and Abdul Hakim Okleh, September, 389–393.

Deformation Process of a Water Droplet Impinging on a Solid Surface, Natsuo Hatta, Hitoshi Fujimoto, and Hirohiko Takuda, September, 394–401.

Free Surface Flow Profile and Fluctuations of a Circular Hydraulic Jump Formed by an Impinging Jet, J. W. Stevens, December, 677–682.

The Introduction of Micro Cells to Treat Pressure in Free Surface Fluid Flow Problems, Peter E. Raad, Shea Chen, and David B. Johnson, December, 683–690.

GENERAL TOPICS

Molecular Dynamics Simulations on Internal Structures of Normal Shock Waves in Lennard-Jones Liquids, Akira Satoh, March, 97-103.

The Effect of Rotary Arms on Corotating Disk Flow, John Girard, Scott Abrahamson, and Kevin Uznanski, June, 259–262.

A Fast, Accurate Real Gas Equation of State for Fluid Dynamic Analysis Applications, R. H. Aungier, June, 277–281.

Analysis of Throughflow Velocity in Two-Dimensional Fluidized Bed Bubbles, Dinesh Gera and Mridul Gautam, June, 319–322.

Three-Dimensional Chaotic Mixing of Fluids in a Cylindrical Cavity, K. C. Miles, B. Nagarajan, and D. A. Zumbrunnen, December, 582–588.

Capillary Instability of a Liquid Film on a Wire, H. Teng, C. M. Kinoshita, and S. M. Masutani, December, 673–676.

JET FLOWS

Theoretical Study of a Laminar Jet in a Double-Diffusion Environment, M. Priven, J. F. Atkinson, G. A. Bemporad, and H. Rubin, September, 341–346.

Experimental Study of a Laminar Jet in a Double-Diffusion Environment, M. Priven, G. A. Bemporad, J. Atkinson, and H. Rubin, September, 347–354.

Predictions of the Structure of Turbulent, Highly Underexpanded Jets, P. S. Cumber, M. Fairweather, S. A. E. G. Falle, and J. R. Giddings, December, 599–604.

Mass Flow and Thrust Performance of Nozzles With Mixed and Unmixed Nonuniform Flow, Reiner Decher, December, 617–622.

The Interaction Between a Jet and a Flat Plate—An Inviscid Analysis, W. L. Chow, Z. P. Ke, J. Q. Lu, December, 623–627.

MULTIPHASE FLOWS

An Investigation of Nucleating Flows of Steam in a Cascade of Turbine Blading-Theoretical Treatment, F. Bakhtar, M. R. Mahpeykar, and K. K. Abbas, March, 138–144.

Effect of Hydrofoil Planform on Tip Vortex Roll-Up and Cavitation, D. H. Fruman, P. Cerrutti, T. Pichon, and P. Dupont, March, 162–169.

Liquid Jet Pumps for Two-Phase Flows, R. G. Cunningham, June, 309–316.

Planar Ultrasonic Imaging of a Two-Phase Mixture, A. Shekarriz and B. B. Brenden, June, 317–319.

Preliminary Investigation of the Use of Air Injection to Mitigate Cavitation Erosion, R. E. A. Arndt, C. R. Ellis, and S. Paul, September, 498–504.

Developing Lengths in Horizontal Two-Phase Bubbly Flow, B. A. Warren and J. F. Klausner, September, 512–518.

On the Effect of Surface Roughness on the Vapor Flow Under Leidenfrost-Levitated Droplets, M. Prat, P. Schmitz, and D. Poulikakos, September, 519–525.

The Ducted Tip—A Hydrofoil Tip Geometry With Superior Cavitation Performance, S. I. Green and S. Z. Duan, December, 665–672.

Capsule Transport in Coal Slurry Medium, J. Seaba and G. Xu, December, 691–696.

Flow Patterns and Pressure Drop in Air/Water Two-Phase Flow in Horizontal Helicoidal Pipes, A. Awwad, R. C. Xin, Z. F. Dong, M. A. Ebadian, and H. M. Soliman, December, 720–726.

Freon Bubble Rise Measurements in a Vertical Rectangular Duct, P. F. Vassallo, P. D. Symolon, W. E. Moore, and T. A. Trabold, December, 729–732.

PARTICULATE FLOW

An Experimental Data Base for the Computational Fluid Dynamics of Reacting and Nonreacting Methanol Sprays, V. G. McDonell and G. S. Samuelsen, March, 145–153.

Dispersion of Ellipsoidal Particles in an Isotropic Pseudo-Turbulent Flow Field, Fa-Gung Fan and Goodarz Ahmadi, March, 154–161.

A Numerical Investigation of Laminar Flow Past Nonspherical Solids and Droplets, J. K. Comer, C. Kleinstreuer, March, 170–175.

Mathematical Modeling of Swirling Flames of Pulverized Coal: What Can Combustion Engineers Expect From Modeling, R. Weber, A. A. F. Peters, P. P. Breithaupt, and B. M. Visser, June, 289–297.

Particle Size and Velocity Discrimination in a Sediment-Laden Turbulent Flow Using Phase Doppler Anemometry, S. J. Bennett and J. L. Best, September, 505–511.

Simulation of Paint Transfer in an Air Spray Process, P. G. Hicks, and D. W. Senser, December, 713–719.

PIPE, DUCT, CHANNEL FLOWS

The Effect of Torsion on the Bifurcation Structure of Laminar Flow in a Helical Square Duct, C. J. Bolinder, June, 242–248.

A Calculation Method for Developing Turbulent Flow in Rectangular Ducts of Arbitrary Aspect Ratio, M. Naimi and F. B. Gessner, June, 249–258.

Dense Gas Flow in Minimum Length Nozzles, A. C. Aldo and B. M. Argrow, June, 270–276.

Flow Distribution and Pressure Drop in Diffuser-Monolith Flows, J. Y. Kim, M.-C. Lai, P. Li, and G. K. Chui, September, 362–368.

Parallel Pipelining, D. D. Joseph, R. Bai, T. Y. Liao, A. Huang, and H. H. Hu, September, 446–449.
The Effect of Constriction Size on the Pulsatile Flow in a Channel, Moshe Rosenfeld and Shmuel Einav, December, 571–576.
Prediction of Compressible Flow Pressure Losses in 30-150 Deg Sharp-Cornered Bends, Nia Haidar, December, 589–592.

SEPARATION

Separating and Reattaching Flow Structure in a Suddenly Expanding Rectangular Duct, G. Papadopoulos and M. V. Otugen, March, 17–23.
Mixing of a Generalized Newtonian Fluid in a Cavity, F. H. Ling and X. Zhang, March, 75–80.
Application of Turbulence Models to Separated Flow Over Rough Surfaces, V. C. Patel and J. Y. Yoon, June, 234–241.
Structure of Turbulence in an Incipient-Separating Axisymmetric Flow (Data Bank Contribution), Rakesh K. Singh and Ram S. Azad, September, 433–438.
Calculation of Laminar Separated Flow in Symmetric Two-Dimensional Diffusers, Yeng-Yung Tsui and Chia-Kang Wang, December, 612–616.

STABILITY AND TRANSITION

Numerical Investigation of Unsteady Transitional Flow Over Oscillating Airfoil, S.-W. Kim, K. B. M. Q. Zaman, and J. Panda, March, 10–16.
Stability of Computational Algorithms Used in Molecular Dynamics Simulations, September, 531–534.
On the Roughness Reynolds Number Transition Criterion, J. A. Masad, December, 727–729.

TURBULENT FLOWS

Effect of Reynolds Number on Isotropic Turbulent Dispersion, Renwei Mei and Ronald J. Adrian, September, 402–409.
Vorticity Transport Analysis of Turbulent Flows, J. J. Gorski and P. S. Bernard, September, 410–416.
A Modified Low-Reynolds-Number Turbulence Model Applicable to Recirculating Flow in Pipe Expansion, K. C. Chang, W. D. Hsieh, and C. S. Chen, September, 417–423.
Structural Parameters and Prediction of Adverse Pressure Gradient Turbulent Flows: An Improved $\kappa-\epsilon$ Model, G. Chukkapalli and O. F. Turan, September, 424–432.
A Note on the Baldwin-Lomax Turbulence Model, J. He and J. D. A. Walker, September, 528–531.
A Simple, Accurate Integral Solution for Accelerating Turbulent Boundary Layers With Transpiration, James Sucec, September, 535–538.
Assessment of a Reynolds Stress Closure Model for Appendage-Hull Junction Flows, Hamn-Ching Chen, December, 557–563.

UNSTEADY FLOWS

Effects of Initial Acceleration on the Flow Field Development Around Rapidly Pitching Airfoils (Data Bank Contribution), C. P. Gendrich, M. M. Koochesfahani, and M. R. Visbal, March, 45–49.
Propagation of the Velocity Shear Front in Spin-Up From Rest in a Cut-Cone, Jae Won Kim and Jae Min Hyun, March, 58–61.
Experimental and Numerical Investigation of Flow Oscillations in a Rectangular Cavity, J. C. F. Pereira and J. M. M. Sousa, March, 68–74.
Oscillatory Electrohydrodynamic Gas Flows, F. C. Lai, P. J. McKinney, and J. H. Davidson, September, 491–497.
An Experimental Study of Pulsatile Flow in Canine Larynges, F. Alipour, R. C. Scherer, and V. C. Patel, December, 577–581.
Theoretical and Experimental Study of Development of Two-Dimensional Steady and Unsteady Wakes Within Curved Channels, M. T. Schobeiri, K. Pappu, and J. John, December, 593–598.
